EVAPO-RUST COOLING SYSTEM CLEANER

FOR PROFESSIONAL RESTORATION!

EVAPO-RUST Cooling System Cleaner is a concentrated rust removing formulation based on our 3-TIME AWARD WINNING rust remover technology. Cooling System Cleaner works through selective chelation at a pH of 6.1 to 7.0 (neutral) and does not require any special equipment or personal protective wear.

Cooling System Cleaner, when used as directed, is non-corrosive to steel and will not harm copper, brass, aluminum, plastic, rubber, silicone,

or vinyl. EVAPO-RUST Cooling System Cleaner will not remove coatings such as non-oxide paint or chrome that are still bonded to the surface. Not suggested for use with magnesium or magnesium alloys.

- 1) Drain the water/anti-freeze from cooling system.
- 2) Pour 1 quart (32 ounces) into cooling system for every 2 gallons of water/anti-freeze removed.
- 3) Add water to cooling system until full.
- 4) Start engine and allow engine to run with heater on for 45 minutes - 1 1/2 hours.
- 5) Drain (solution should be black) and flush radiator/cooling system. Repeat steps 1 - 5 once more if necessary.
- 6) Fill cooling system with appropriate anti-freeze/water.

TYPICAL PROPERTIES

Appearance	Amber, Slightly Viscous
Odor	Mild Odor
pH @ 1%	6 - 7
Environmental Data	Biodegradable

De-rust your entire block and cooling system without dismantling!
